OFFICE ACTION

Specification

1. The specification is objected to because of the following informality:

Paragraph 0007, line 1, replace "Figs. 1 and 2" with --Figs. 1 through 3--

Drawings

2. Figures 1-3 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application.

Claim Rejections - 35 U.S.C. § 112

3. Claims 2 and 3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Examiner notes that paragraph 0015 disclosing "the first polysilicon layer may be between 300Å and 2500Å thicker than the device isolation layer" is different than paragraph 0028 disclosing "the first polysilicon layer may be 300Å-2500Å thicker than the first trench." Paragraph 0028 supports claims 2-3. However, paragraph 0015 and the application's figures supports "the first polysilicon layer 44 formed more thickly than the device isolation layer 52" because trench T1 itself is a lot thicker than the polySi layer 44. Please clarify the subject matter of claims 2 and 3

Allowable Subject Matter

4. Claims 1 and 4-8 are allowed. Following is the statement reason for allowance:

The closest prior art, US 6,724,036 to *Hsieh et al* discloses features of the invention except for the teaching of "forming a first trench on the exposed part of the substrate and a second trench on the exposed part of the floating gate."
